

THINK BEFORE YOU FLUSH!

The water you flush goes through wastewater pipes to reach our treatment plants. Please consider our infrastructure and dispose of these items in a waste bin.

Flush Facts:

- The wastewater collection system consists of 6,451 miles of pipelines and 1,047 pump stations.
- The department has three wastewater treatment plants, treating approximately 295 million gallons per day combined.
- Miami-Dade Water and Sewer crews work on approximately 600 blockages per year due to items that should not be flushed.
- It costs the department more than \$400,000 per year to repair blocked pipes.

QUALITY. VALUE. ECONOMIC GROWTH.
